

RAJA PANDI G R

DATA ENGINEER

+91 99420 90134
rajapandi2108@gmail.com

PROFESSIONAL SUMMARY

Results-oriented Data Engineer with 2.11 years of experience having a strong background Data Engineering tools in Python, SQL, Scala, and Hadoop ecosystem technologies. Skilled in data storage and processing using Azure, Apache Spark, Hive, and PySpark. Demonstrated success in managing and analysing large datasets, optimizing ETL processes, and delivering valuable insights to drive business decision-making. Proactive collaborator with excellent problem-solving abilities, seeking an opportunity to leverage skills and contribute to a reputed organization's data driven success.

SKILLS & ABILITIES

- **Big Data:** Hadoop, Apache Spark, Hive, Apache Sqoop
- **Database:** MySQL, PostgreSQL. Azure SQL DB
- **Language:** Python, SQL, PySpark
- **Cloud :** Snowflake, Azure Cloud, Azure Data Factory, ADLS Gen 2, AWS S3, AWS Athena, AWS Glue, AWS Lambda, Databricks, Synapse Analytics
- **Operating System:** Windows, Linux
- **Other Tools:** MS Office, IDE Eclipse, GitHub, Cloudera CDH, MS SQL Server, PyCharm

EXPERIENCE

Oct 2023 – till date, Optisol Business Solutions, Madurai

Role – Data Engineer

Dec 2021 – Oct 2023, Wipro Limited, Chennai

Role – Senior Analyst

June 2021 – Dec 2021, Wipro Limited, Chennai

Role – Intern

EDUCATION

Thiagarajar College of Engineering, Madurai

- B.E(Computer Science and Engineering)
- 2018 – 2021
- CGPA – 7.71

Tamil Nadu Polytechnic College, Madurai

- Diploma(Computer Engineering)
- 2015 – 2018
- Percentage – 95.75

PROJECTS

PROJECT NAME: AYM Commerce Data Migration(E-Commerce)

TECHNOLOGIES USED: PostgreSQL, Azure Cloud, Azure Data Factory, Confluence

Environment: Azure Cloud

Roles and Responsibilities:

- Currently engaged in a data migration endeavor, transitioning data from a Version 1 application to a Version 2 application.
- Established a pipeline that effectively migrates data from AWS Postgres to Azure Postgres and am presently focused on mapping columns in each table. Additionally, Developed a Python script to validate the entirety of the data migration process, ensuring its success.
- Documenting the data requirements from the perspective of front-end developers, detailing how data should be stored in the backend system.

PROJECT NAME: VERSAND DATA

TECHNOLOGIES USED: AWS Glue, Lambda, S3, Snowflake

Environment: AWS Cloud

Roles and Responsibilities:

- Proficient in seamlessly ingesting records via SFTP into S3, with automatic Lambda triggering upon file arrival.
- Skilled in orchestrating comprehensive data transformations within Glue, converting unstructured data to structured formats before storing the processed files back in designated S3 folders.
- Experienced in utilizing SQS for efficient data transfer from S3 to Snowflake, managing staging and actual table loading through Snowpipe integration.

PROJECT NAME: CINTAS HEALTH CARE(HealthCare)

TECHNOLOGIES USED: Azure Data Factory, PySpark, ADLS, SQLDB

Environment: Azure Cloud

Roles and Responsibilities:

- Proficient in extracting data from diverse file formats from a shared location and ingesting it into the Blob Storage. Utilized Azure Data Factory to build a successful pipeline to process the data.
- Designed and implemented 3-tier SQL DB table tables for efficient querying and processing of data residing in Blob Storage.
- Leveraged PySpark code and data flow to update and transform the data, eliminating erroneous records and removing unwanted columns, ensuring high-quality data for storage in the final SQL DB table.

CERTIFICATIONS

- Databricks Lakehouse Fundamentals Certification(Completion Date – 8-Apr-2024)
- TrendyTech Big Data Master’s Program(Completion Date – 17-Aug-2023)
- IBM Data Engineering Professional Certificate provided by IBM from Coursera.
(Completion Date –21-Jan-2023)
- Google Data Analytics Professional Certificate provided by Google from Coursera.
(Completion Date –17-Aug-2022)
